

Public biological breadth tests portability across domains

Independent public system matrix · 3 alternatives · Global sensitivity, public biological sensitivity, amplitude, PK, PD, residence-amplitude divergence and sufficiency boundary

A

declared method call	Y	Y	~	consistent
overgeneralized mechanism	N	~	Y	ruled out
insufficient input context	~	Y	Y	equivocal

B

C

Top 3 drivers (residence, amplitude, window) account for 82% of total variance.

D

declared method call	Y	Y	~	consistent
overgeneralized mechanism	N	~	Y	ruled out
insufficient input context	~	Y	Y	equivocal

E

F

declared method call	Y	Y	~	consistent
overgeneralized mechanism	N	~	Y	ruled out
insufficient input context	~	Y	Y	equivocal

Top 3 drivers (residence, amplitude, window) account for 82% of total variance.
