

Sealed held-out validation shows pass, comparator-sufficient, and inconclusive outcomes

Predeclared splits, thresholds, and margin gap · 0 sig · held-out validation · 0 sig · Object-level held-out trajectory (TAS [-0.20, 0.20]) · 0 significant, 0 null-accepting

A

No-hidden-tuning and gate status

D

declared method call	Y	Y	~	consistent
overgeneralized mechanism	N	~	Y	ruled out
insufficient input context	~	Y	Y	equivocal

supports · N = rules out · ~ = equivocal

Prospective validation consistency · 3 alternatives

E

declared method call	Y	Y	~	consistent
overgeneralized mechanism	N	~	Y	ruled out
insufficient input context	~	Y	Y	equivocal

supports · N = rules out · ~ = equivocal
